

Securing a Child in a Booster Seat

Always follow your car seat manual instructions when positioning a child in their booster seat.

A booster seat must be used with a lap and shoulder seat belt.

Step 1:

Place the booster seat on the vehicle seat.

Step 2:

Have the child sit on the booster seat and buckle the seat belt.

Step 3:

Ensure the shoulder belt is over the shoulder and across the chest. The lap belt should fit snug over the child's hips.

Step 4:

Use the seat belt guide provided on the booster seat to position the shoulder belt correctly.
