

Securing a Child Using a Booster Seat

Before you start:

- A booster seat must be used with a lap/shoulder seat belt
- Lap-only seat belts cannot be used with a booster seat

Step 1:

Place the booster seat on the vehicle seat.

Step 2:

Have the child sit on the booster seat and buckle the seatbelt. Ensure the shoulder belt is over the shoulder and across the chest. The lap belt should fit snug over the child's hips.

Step 3:

If the shoulder belt is rubbing on the child's neck, use the seat belt guide provided on the booster seat to position the shoulder belt correctly. Seat belt guides are only used if needed for comfort.
